**DETAILED ACTION**

***Response to Amendment***

1. The Examiner has carefully considered applicant's amendments and accompanying remarks dated 12/28/07. The declaration dated 12/28/07 has also been considered, made of record and placed in the file. Applicant's amendments to the claims have been entered. The amendments remove the "single use" limitations and narrow the claim language to "consisting essentially of." The pending claims at this time in the prosecution are 1, 2, 4, 5, 6 and 8. All other claims are cancelled.
2. The IDS dated 02/19/2008 has been reviewed and is being remitted herewith.
3. The rejection made under 112-1<sup>st</sup> in the second paragraph and 112- 2 in paragraphs 4-7 of the last office is withdrawn as Applicant has amended the.
4. The rejection made under the double patenting statute is also withdrawn as claims in both the applications have been extensively amended and are no longer coextensive in scope.
5. The Declaration filed under 37 CFR 1.132 of Ms. Dianne Ellis is acknowledged, however Applicant's arguments are not commensurate in scope as Applicant's claims do not recite any chemical make up of what the ionic, cationic or any other binder for that matter may be, no molecular weight or even a degree of hydrolysis. Therefore, without knowing chemically or physically what these ingredients are the Radwanski reference still meets the limitations as currently claimed.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4, 5, 6 and 8 rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5421898 issued to Cavanagh et al and cited in the search report supplied by applicant on IDS dated 02/19/08).

7. In an effort to keep the prosecution consistent, the Examiner is restating the rejection that the European search report has applied.

8. Cavanagh teaches substrates having controlled release of quaternary disinfectant in an aqueous solution (abstract). Cavanagh discloses using a nonwoven wipe substrate coated with a water soluble polymer and a quaternary ammonium disinfectant. The polymer binds the agent and enables the controlled release in aqueous solutions of the quaternary disinfectant (claim 3). The polymer used is non ionic (Polyvinyl alcohol, column 3 lines 13-16). In instant reference describes that the nonwoven substrate can be hydroentangled (Column 2 line 22). And that it is specifically disclosed that the wipe is efficacious on hard surface cleaning (column 2 lines 4-5). The substrates that are used can also be formed into composite or laminate form having additional nonwoven layers.

### ***Conclusion***

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
